DECEMBER 2015

Stevens Receives NJ Tech Council's "Knowledge is Power" Award

From fusing technology and medicine to create sophisticated techniques for fighting cancer to pioneering the future of coastal sustainability and resiliency, Stevens was recognized for innovations that advance the state's burgeoning tech sector.

Cybersecurity, Climate Change Threats Discussed at Maritime Risk Symposium

Keynote speaker Admiral Paul F. Zukunft, Commandant of the U.S. Coast Guard, underscored the importance of both a cyber strategy for securing maritime activities and of planning for the effects of climate change.

Sound Science: Studying the Acoustics of Daily Life

Professor Marehalli Prasad and the echo-free chamber he helped build are drawing researchers to Stevens to study sound in its purest form.

Stevens Research Integrates Electronics with the Body

"Bionic systems" research performed in the Stevens lab of mechanical engineering professor Manu Mannoor could lead to custom-formed body parts that mimic or enhance human functions such as hearing.

New Tool Tests Financial Markets for Potential Crashes

A new simulation platform being built in the School of Business will probe global markets and exchanges for vulnerabilities.

When it Comes to Big Data, Big Thinking is Critical

Dr. Sandeep Sacheti, an executive vice president at Wolters Kluwer, urged a standing-room-only crowd at Stevens to think differently about data and how it can be used to make better decisions.

Stevens Alumni Tasked to Help Transform Hoboken's Washington Street

Michael Manzella '09 and Christine Ballard '07 are two of the municipal engineers who will take part in redesigning the city's iconic roadway to accommodate pedestrians, bicyclists and motorists.

Hoboken's favorite son Frank Sinatra (who would have turned 100 this year on December 12) attended the Stevens Commencement on May 23, 1985 to receive an honorary degree from his hometown university.
